

***STEMWAVE***

*NON-INVASIVE PAIN RELIEF*

# WHAT IS STEMWAVE?

- **Without getting too technical, StemWave is an FDA cleared medical device that utilizes harmless, yet powerful acoustic waves to activate the body's natural healing mechanisms**
- **This non-invasive treatment option was designed to help patients dealing with musculoskeletal conditions causing pain and inflammation**

# Is StemWave FDA approved?

- **StemWave™ is the most advanced, highly effective, non-invasive treatment cleared by the FDA to treat degenerative conditions and chronic pain**
- **It delivers the most effective Extracorporeal Shock Wave Therapy (ESWT) available**

# HOW DOES IT WORK?

- **When waves penetrate damaged tissue or areas of inflammation, it activates a natural response as if a new injury has occurred**
- **This kickstarts the biological healing process - sending healing agents to help reduce inflammation and repair damaged tissue in the injured area**
- **The Ultimate goal of treatment is to “awaken” dormant cells critical for healing – without the need for invasive procedures or medication**

# DOES TREATMENT HURT?

- **When we are trying to identify damaged tissue or inflammation, we will move the treatment source around the injured area**
- **When the waves from the treatment source penetrate healthy tissue, you won't feel much of anything**
- **However, when the waves hit damaged tissue, you will experience manageable pain or discomfort— but not of intensity that requires numbing cream or anesthetic**

# WHAT TO EXPECT THE FIRST VISIT (CONSULTATION & TREATMENT)

- Our providers will conduct an interactive consultation to discuss more about StemWave, your goals, and expectations regarding your specific case
- At the start of the treatment, we utilize the device as a diagnostic tool over injured areas to identify the primary location(s) of pain
- Once located, we focus the remainder of treatment towards that area to ensure we maximize the positive biological effects
- The treatment is typically less than 10 minutes

# TREATMENT BENEFITS

- • **Non-invasive & drug-free**
- • **Promotes natural healing**
- • **Decreases inflammation**
- • **Increases circulation**
- • **Relieves aches and pains with 5-10 minute treatments**
- • **No recovery time**
- • **No negative side effects**

# CONDITIONS TREATED BY STEMWAVE THERAPY

- KNEE PAIN
- JOINT PAIN
- HERNIATED DISKS
- PLANTAR FASCIITIS
- STRESS FRACTURES
- TENDONITIS
- WOUND CARE
- SHIN SPLINTS
- AND MANY MORE

# **SUBSEQUENT TREATMENTS (CARE PLANS)**

- **Patients often feel immediate improvement after their first visit, However, this is not a “one and done” treatment solution**
- **Subsequent treatments are required to further healing and achieve lasting results**
- **Based on your specific goals & expectations, our team will put together a recommended care plan that best suits your needs**
- **Care plans commonly range between 8-12 sessions**
- **Patients typically experience significant progress after 3-4 treatments, however, we often see a noticeable improvement after the first treatment**
- **Subsequent treatments that follow will offer continual improvement and sustained results**
